

Vacuumlabs Team Proposal

Period: 1 November 2022–31 January 2023 (3 months)

Proposal: Vacuumlabs dedicated team API3 development contribution

Amount: 0 USDC

Token allocation to contributors: We request up to 180,000 API3 tokens from the [hot wallet](#) to incentivize the API3-dedicated team from [Vacuumlabs](#) at Ethereum address 0x20AB51856126cF0F8A3e4013877BED63E39c1BFC.

Proposal parameters

Creator: [bbenligiray.eth](#)

Target Contract Address: 0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48 (USDC)

Target Function Signature: transfer(address,uint256)

Parameters: ["0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48", "0"]

The function call above does nothing in practice (transfers 0 USDC to the USDC token contract). This proposal is solely to allow the DAO to signal intent about the verbal components of this proposal.

Summary

A dedicated [Vacuumlabs](#) team started to contribute to API3 ecosystem codebases (mainly Airnode, ChainAPI and API3 DAO Dashboard) back in May 2021. Since then, the team has delivered a great amount of work and became a crucial part of API3 ecosystem product delivery efforts. The team would like to continue contributing to the API3 open-source codebase in cooperation with the API3 core technical team (anticipated to be substantially similar to the most recent contributing team [here](#)) and other technical ecosystem contributors, such as ChainAPI, Inc., and requests the above grant of API3 tokens to further strengthen aligned incentives and participate in API3 governance in lieu of a USDC grant for this period.

Responsibilities

- Contribute to the Airnode codebase according to the roadmap defined by the core technical team and agreed by API3 DAO.
- Contribute to the ChainAPI codebase according to the roadmap defined by the ChainAPI, Inc. team and as agreed by API3 DAO in [this proposal](#).
- Contribute to the Omnimarket codebase according to the roadmap defined by the core technical team and agreed by API3 DAO.
- Contribute to the API3 DAO Dashboard codebase according to the roadmap defined by the core technical team and agreed by API3 DAO.

- Support development of any additional products reasonably requested by the core technical team.

Budget

Development grant	Up to 180,000 API3 tokens
-------------------	---------------------------

Team

Name	Role	Basis
Adam Teöke	Project Manager	90% FTE
Bogdan Iasinovschi	Senior Developer	FT
Emanuel Tesař	Senior Developer	FT
Martin Kolenič	Tester	30% FTE
Michal Kimle	Senior Developer	FT
Patrik Šimurka	Developer	FT
Michal Karol	Developer	FT
Peter Jurčo	Developer	FT

In the case of unexpected short or long time unavailability of any above team member in the proposed term, the team is committed to compensate for and credit this outage accordingly in a future proposal.

Deliverables

Most of the team's work is kept in public repositories (including those for the API3 ecosystem located at <https://github.com/api3dao>) and can be reviewed in real time. As well as the team's work is being reviewed regularly by the core API3 technical team.

Liability

Vacuumlabs is not responsible for any damages caused to API3 resulting from team member contributions to the API3 codebases.
